23. Problem: (use additional Sheets if necessary) The security package, Find_DDOS 4.2, was delivered and installed in the EDF, VATC, PVC and the DAACs to meet security requirements. With the subsequent delivery of the Firewall, this package was no longer required to meet security requirements. The freeware package was provided and supported by the FBI through 2002. However, the software currently is no longer under active development.						
24. Proposed Solution: (use additional sheets if necessary) Remove Find_DDOS 4.2 from the EMD Baseline and installed hosts, since software is no longer needed to meet security requirements and is not currently being updated to address current vulnerabilities. The Security Group has reviewed this issue and has recommended removal. Tech Directive 05-xxx will provide removal instructions. The baseline changes and Tech Directive are being delivered with this CCR. These removal instructions have been tested with CCR 05-0138 in VATC/PVC with no issues.						
25. Alternate Solution: (use additional sheets if necessary) Continue to retain and expend resources on software with limited short or long-term benefit to the program.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) Continue including software in EMD Software Processes, using resources that would be better directed to more productive purposes.						
27. Justification for Emergency (If Block 15 is "Emergency"):
